1. Aims

Our school aims to:

- Provide and maintain a safe and healthy environment
- Establish and maintain safe working procedures amongst staff, pupils and all visitors to the school site
- Have robust procedures in place in case of emergencies
- Ensure that the premises and equipment are maintained safely, and are regularly inspected

2. Legislation

This policy is based on advice from the Department for Education on [health and safety in schools](#) and the following legislation:

- [The Health and Safety at Work etc. Act 1974](#), which sets out the general duties employers have towards employees and duties relating to lettings

- [The Management of Health and Safety at Work Regulations 1992](#), which require employers to make an assessment of the risks to the health and safety of their employees
- [The Management of Health and Safety at Work Regulations 1999](#), which require employers to carry out risk assessments, make arrangements to implement necessary measures, and arrange for appropriate information and training
- [The Control of Substances Hazardous to Health Regulations 2002](#), which require employers to control substances that are hazardous to health
- [The Reporting of Injuries, Diseases and Dangerous Occurrences Regulations \(RIDDOR\) 2013](#), which state that some accidents must be reported to the Health and Safety Executive and set out the timeframe for this and how long records of such accidents must be kept
- [The Health and Safety \(Display Screen Equipment\) Regulations 1992](#), which require employers to carry out digital screen equipment assessments and states users' entitlement to an eyesight test
- [The Gas Safety \(Installation and Use\) Regulations 1998](#), which require work on gas fittings to be carried out by someone on the Gas Safe Register
- [The Regulatory Reform \(Fire Safety\) Order 2005](#), which requires employers to take general fire precautions to ensure the safety of their staff
- [The Work at Height Regulations 2005](#), which requires employers to protect their staff from falls from height

The school follows [national guidance published by Public Health England](#) when responding to infection control issues.

From September 2020 Sections of this policy are also based on the [statutory framework for the Early Years Foundation Stage](#).

This policy complies with our funding agreement and articles of association.

3. Roles and responsibilities

3.1 The local authority and governing board

Medway Council has ultimate responsibility for health and safety matters in the school, but delegates responsibility for the strategic management of such matters to the school's governing board.

The governing board delegates operational matters and day-to-day tasks to the headteacher and staff members.

3.1 The governing board

The governing board has ultimate responsibility for health and safety matters in the school, but will delegate day-to-day responsibility to Peter Sears (Headteacher).

The governing board has a duty to take reasonable steps to ensure that staff and pupils are not exposed to risks to their health and safety. This applies to activities on or off the school premises.

The Local Governing Body and FPTA Trust as the employer, also has a duty to:

- Assess the risks to staff and others affected by school activities in order to identify and introduce the health and safety measures necessary to manage those risks
- Inform employees about risks and the measures in place to manage them
- Ensure that adequate health and safety training is provided

The governor who oversees health and safety is Denise Ford.

3.2 Headteacher

The headteacher is responsible for health and safety day-to-day. This involves:

- Implementing the health and safety policy
- Ensuring there is enough staff to safely supervise pupils

- Ensuring that the school building and premises are safe and regularly inspected
- Providing adequate training for school staff
- Reporting to the governing board on health and safety matters
- Ensuring appropriate evacuation procedures are in place and regular fire drills are held
- Ensuring that in their absence, health and safety responsibilities are delegated to another member of staff
- Ensuring all risk assessments are completed and reviewed
- Monitoring cleaning contracts, and ensuring cleaners are appropriately trained and have access to personal protective equipment, where necessary

In the headteacher's absence, Melissa Ireland (Deputy Headteacher) assumes the above day-to-day health and safety responsibilities.

3.3 Health and safety lead

The nominated health and safety lead is Peter Sears.

3.4 Staff

School staff have a duty to take care of pupils in the same way that a prudent parent would do so.

Staff will:

- Take reasonable care of their own health and safety and that of others who may be affected by what they do at work
- Co-operate with the school on health and safety matters
- Work in accordance with training and instructions
- Inform the appropriate person of any work situation representing a serious and immediate danger so that remedial action can be taken
- Model safe and hygienic practice for pupils
- Understand emergency evacuation procedures and feel confident in implementing them

3.5 Pupils and parents

Pupils and parents are responsible for following the school's health and safety advice, on-site and off-site, and for reporting any health and safety incidents to a member of staff.

3.6 Contractors

Contractors will agree health and safety practices with the headteacher before starting work. Before work begins the contractor will provide evidence that they have completed an adequate risk assessment of all their planned work.

4. Site security

Gary Weston (Premises Manager) is responsible for the security of the school site in and out of school hours. They are responsible for visual inspections of the site, and for the intruder and fire alarm systems.

Gary Weston, Melissa Ireland, Samantha Wady and Sharon Davis are key holders and will respond to an emergency.

5. Fire

Emergency exits, assembly points and assembly point instructions are clearly identified by safety signs and notices. Fire risk assessment of the premises will be reviewed regularly.

Emergency evacuations are practiced at least once a term.

The fire alarm is a loud intermittent bell/buzzer.

Fire alarm testing will take place once a week.

New staff will be trained in fire safety and all staff and pupils will be made aware of any new fire risks.

In the event of a fire:

- The alarm will be raised immediately by whoever discovers the fire and emergency services contacted. Evacuation procedures will also begin immediately
- Fire extinguishers may be used by staff only, and only then if staff are trained in how to operate them and are confident, they can use them without putting themselves or others at risk
- Staff and pupils will congregate at the assembly points. These are at and inside the MUGA.
- Form tutors/class teachers will take a register of pupils, which will then be checked against the attendance register of that day
- Jo Penn will take a register of all staff
- Staff and pupils will remain outside the building until the emergency services say it is safe to re-enter

The school will have special arrangements in place for the evacuation of people with mobility needs and fire risk assessments will also pay particular attention to those with disabilities.

A fire safety checklist can be found in appendix 1.

displayed near where hazardous products are stored and in areas where they are routinely used.

15. Infection prevention and control

We follow national guidance published by Public Health England when responding to infection control issues. We will encourage staff and pupils to follow this good hygiene practice, outlined below, where applicable.

15.1 Handwashing

- Wash hands with liquid soap and warm water, and dry with paper towels (available in each classroom)
- Always wash hands after using the toilet, before eating or handling food, and after handling animals
- Cover all cuts and abrasions with waterproof dressings

15.2 Coughing and sneezing

- Cover mouth and nose with a tissue
- Wash hands after using or disposing of tissues
- Spitting is discouraged

15.3 Personal protective equipment

- Wear disposable non-powdered vinyl or latex-free CE-marked gloves and disposable plastic aprons where there is a risk of splashing or contamination with blood/body fluids (for example, nappy or pad changing)
- Wear goggles if there is a risk of splashing to the face
- Use the correct personal protective equipment when handling cleaning chemicals

15.4 Cleaning of the environment

- Clean the environment frequently and thoroughly, door handles, desks etc
- Clean the environment, including toys and equipment, frequently and thoroughly

15.5 Cleaning of blood and body fluid spillages

- Clean up all spillages of blood, faeces, saliva, vomit, nasal and eye discharges immediately and wear personal protective equipment
- When spillages occur, clean using a product that combines both a detergent and a disinfectant and use as per manufacturer's instructions. Ensure it is effective against bacteria and viruses and suitable for use on the affected surface
- Never use mops for cleaning up blood and body fluid spillages – use disposable paper towels and discard clinical waste as described below
- Make spillage kits available for blood spills

15.6 Laundry

- Wash laundry in a separate dedicated facility
- Wash soiled linen separately and at the hottest wash the fabric will tolerate
- Wear personal protective clothing when handling soiled linen
- Bag children's soiled clothing to be sent home, never rinse by hand

15.7 Clinical waste

- Always segregate domestic and clinical waste, in accordance with local policy
- Used nappies/pads, gloves, aprons and soiled dressings are stored in correct clinical waste bags in foot-operated bins
- Remove clinical waste with a registered waste contractor
- Remove all clinical waste bags when they are two-thirds full and store in a dedicated, secure area while awaiting collection

15.8 Animals

- Wash hands before and after handling any animals
- Keep animals' living quarters clean and away from food areas
- Dispose of animal waste regularly, and keep litter boxes away from pupils
- Supervise pupils when playing with animals
- Seek veterinary advice on animal welfare and animal health issues, and the suitability of the animal as a pet

15.9 Pupils vulnerable to infection

Some medical conditions make pupils vulnerable to infections that would rarely be serious in most children. The school will normally have been made aware of such vulnerable children. These children are particularly vulnerable to chickenpox, measles or slapped cheek disease (parvovirus B19) and, if exposed to either of these, the parent/carer will be informed promptly and further medical advice sought. We will advise these children to have additional immunisations, for example for pneumococcal and influenza.

15.10 Exclusion periods for infectious diseases

The school will follow recommended exclusion periods outlined by Public Health England, summarised in appendix 4.

In the event of an epidemic/pandemic, we will follow advice from Public Health England about the appropriate course of action.

16. New and expectant mothers

Risk assessments will be carried out whenever any employee or pupil notifies the school that they are pregnant.

Appropriate measures will be put in place to control risks identified. Some specific risks are summarised below:

- Chickenpox can affect the pregnancy if a woman has not already had the infection. Expectant mothers should report exposure to antenatal carer and GP at any stage of exposure. Shingles is caused by the same virus as chickenpox, so anyone who has not had chickenpox is potentially vulnerable to the infection if they have close contact with a case of shingles
- If a pregnant woman comes into contact with measles or German measles (rubella), she should inform her antenatal carer and GP immediately to ensure investigation
- Slapped cheek disease (parvovirus B19) can occasionally affect an unborn child. If exposed early in pregnancy (before 20 weeks), the pregnant woman should inform her antenatal care and GP as this must be investigated promptly

17. Occupational stress

We are committed to promoting high levels of health and wellbeing and recognise the importance of identifying and reducing workplace stressors through risk assessment.

Systems are in place within the school for responding to individual concerns and monitoring staff workloads.

Staff who have been identified as suffering with stress either from work or home will be allocated a member of SLT to oversee and be a contact. Workload will be looked at and a plan which will be looked, which can involve regular meetings, referral to counselling or further interventions agreed with Headteacher.

18. Accident reporting

18.1 Accident record book

- An accident form will be completed as soon as possible after the accident occurs by the member of staff or first aider who deals with it. An accident form template can be found in appendix 2
- As much detail as possible will be supplied when reporting an accident
- Information about injuries will also be kept in the pupil's educational record
- Records held in the first aid and accident book will be retained by the school for a minimum of 3 years, in accordance with regulation 25 of the Social Security (Claims and Payments) Regulations 1979, and then securely disposed of

18.2 Reporting to the Health and Safety Executive

The Headteacher will keep a record of any accident which results in a reportable injury, disease, or dangerous occurrence as defined in the RIDDOR 2013 legislation (regulations 4, 5, 6 and 7).

The Headteacher will report these to the Health and Safety Executive as soon as is reasonably practicable and in any event within 10 days of the incident.

Reportable injuries, diseases or dangerous occurrences include:

- Death
- Specified injuries. These are:
 - Fractures, other than to fingers, thumbs and toes
 - Amputations
 - Any injury likely to lead to permanent loss of sight or reduction in sight
 - Any crush injury to the head or torso causing damage to the brain or internal organs
 - Serious burns (including scalding)
 - Any scalping requiring hospital treatment
 - Any loss of consciousness caused by head injury or asphyxia

- Any other injury arising from working in an enclosed space which leads to hypothermia or heat-induced illness, or requires resuscitation or admittance to hospital for more than 24 hours
- Injuries where an employee is away from work or unable to perform their normal work duties for more than 7 consecutive days
- Where an accident leads to someone being taken to hospital
- Where something happens that does not result in an injury, but could have done
- Near-miss events that do not result in an injury but could have done. Examples of near-miss events relevant to schools include, but are not limited to:
 - The collapse or failure of load-bearing parts of lifts and lifting equipment
 - The accidental release of a biological agent likely to cause severe human illness
 - The accidental release or escape of any substance that may cause a serious injury or damage to health
 - An electrical short circuit or overload causing a fire or explosion

Information on how to make a RIDDOR report is available here:

How to make a RIDDOR report – <http://www.hse.gov.uk/riddor/report.htm>

18.3 Notifying parents

The Deputy Headteacher will inform parents of any accident or injury sustained by a pupil in the Early Years Foundation Stage, and any first aid treatment given, on the same day, or as soon as reasonably practicable.

18.4 Reporting child protection agencies

The DSL will notify The Local Authority of any serious accident or injury to, or the death of, a pupil in the Early Years Foundation Stage while in the school's care.

18.5 Reporting to Ofsted

The Headteacher will notify Ofsted of any serious accident, illness or injury to, or death of, a pupil in the Early Years Foundation Stage while in the school's care. This will happen as soon as is reasonably practicable, and no later than 14 days after the incident.

19. Training

Our staff are provided with health and safety training as part of their induction process.

Staff who work in high risk environments, such as in science labs or with woodwork equipment, or work with pupils with special educational needs (SEN), are given additional health and safety training.

20. Monitoring

This policy will be reviewed by the H&S Committee every 2 years.

At every review, the policy will be approved by the H&S Governor.

21. Links with other policies

This health and safety policy links to the following policies:

- First aid
- Risk assessment
- Supporting pupils with medical conditions
- Accessibility plan

Appendix 1. Fire safety checklist

ISSUE TO CHECK	YES/NO
Are fire regulations prominently displayed?	
Is fire-fighting equipment, including fire blankets, in place?	
Does fire-fighting equipment give details for the type of fire it should be used for?	
Are fire exits clearly labelled?	
Are fire doors fitted with self-closing mechanisms?	
Are flammable materials stored away from open flames?	
Do all staff and pupils understand what to do in the event of a fire?	
Can you easily hear the fire alarm from all areas?	

Appendix 2. Accident report

Name of injured person		Role/class	
Date and time of incident		Location of incident	
Incident details			
Describe in detail what happened, how it happened and what injuries the person incurred			
Action taken			
Describe the steps taken in response to the incident, including any first aid treatment, and what happened to the injured person immediately afterwards			
Follow-up action required			
Outline what steps the school will take to check on the injured person, and what it will do to reduce the risk of the incident happening again			
Name of person attending the incident			
Signature		Date	

Appendix 4. Recommended absence period for preventing the spread of infection

This list of recommended absence periods for preventing the spread of infection is taken from non-statutory guidance for schools and other childcare settings from Public Health England. For each of these infections or complaints, there [is further information in the guidance on the symptoms, how it spreads and some 'do's and don'ts' to follow that you can check.](#)

Infection or complaint	Recommended period to be kept away from school or nursery
Athlete's foot	None.
Campylobacter	Until 48 hours after symptoms have stopped.
Chicken pox (shingles)	<p>Cases of chickenpox are generally infectious from 2 days before the rash appears to 5 days after the onset of rash. Although the usual exclusion period is 5 days, all lesions should be crusted over before children return to nursery or school.</p> <p>A person with shingles is infectious to those who have not had chickenpox and should be excluded from school if the rash is weeping and cannot be covered or until the rash is dry and crusted over.</p>
Cold sores	None.
Rubella (German measles)	5 days from appearance of the rash.
Hand, foot and mouth	Children are safe to return to school or nursery as soon as they are feeling better, there is no need to stay off until the blisters have all healed.
Impetigo	Until lesions are crusted and healed, or 48 hours after starting antibiotic treatment.
Measles	Cases are infectious from 4 days before onset of rash to 4 days after so it is important to ensure cases are excluded from school during this period.
Ringworm	Exclusion not needed once treatment has started.
Scabies	The infected child or staff member should be excluded until after the first treatment has been carried out.
Scarlet fever	Children can return to school 24 hours after commencing appropriate antibiotic treatment. If no antibiotics have been administered the person will be infectious for 2 to 3 weeks. If there is an outbreak of scarlet fever at the school or nursery, the health protection team will assist with letters and factsheet to send to parents or carers and staff.
Slapped cheek syndrome, Parvovirus B19, Fifth's disease	None (not infectious by the time the rash has developed).

Bacillary Dysentery (Shigella)	Microbiological clearance is required for some types of shigella species prior to the child or food handler returning to school.
Diarrhoea and/or vomiting (Gastroenteritis)	Children and adults with diarrhoea or vomiting should be excluded until 48 hours after symptoms have stopped and they are well enough to return. If medication is prescribed, ensure that the full course is completed and there is no further diarrhoea or vomiting for 48 hours after the course is completed. For some gastrointestinal infections, longer periods of exclusion from school are required and there may be a need to obtain microbiological clearance. For these groups, your local health protection team, school health advisor or environmental health officer will advise. If a child has been diagnosed with cryptosporidium, they should NOT go swimming for 2 weeks following the last episode of diarrhoea.
COVID-19	The latest Government advice should be followed including test/trace and Isolation.
Cryptosporidiosis	Until 48 hours after symptoms have stopped.
E. coli (verocytotoxigenic or VTEC)	The standard exclusion period is until 48 hours after symptoms have resolved. However, some people pose a greater risk to others and may be excluded until they have a negative stool sample (for example, pre-school infants, food handlers, and care staff working with vulnerable people). The health protection team will advise in these instances.
Food poisoning	Until 48 hours from the last episode of vomiting and diarrhoea and they are well enough to return. Some infections may require longer periods (local health protection team will advise).
Salmonella	Until 48 hours after symptoms have stopped.
Typhoid and Paratyphoid fever	Seek advice from environmental health officers or the local health protection team.
Flu (influenza)	Until recovered.
Tuberculosis (TB)	Pupils and staff with infectious TB can return to school after 2 weeks of treatment if well enough to do so and as long as they have responded to anti-TB therapy. Pupils and staff with non-pulmonary TB do not require exclusion and can return to school as soon as they are well enough.
Whooping cough (pertussis)	A child or staff member should not return to school until they have had 48 hours of appropriate treatment with antibiotics and they feel well enough to do so or 21 days from onset of illness if no antibiotic treatment.
Conjunctivitis	None.

Giardia	Until 48 hours after symptoms have stopped.
Glandular fever	None (can return once they feel well).
Head lice	None.
Hepatitis A	Exclude cases from school while unwell or until 7 days after the onset of jaundice (or onset of symptoms if no jaundice, or if under 5, or where hygiene is poor. There is no need to exclude well, older children with good hygiene who will have been much more infectious prior to diagnosis.
Hepatitis B	Acute cases of hepatitis B will be too ill to attend school and their doctors will advise when they can return. Do not exclude chronic cases of hepatitis B or restrict their activities. Similarly, do not exclude staff with chronic hepatitis B infection. Contact your local health protection team for more advice if required.
Hepatitis C	None.
Meningococcal meningitis/ septicaemia	If the child has been treated and has recovered, they can return to school.
Meningitis	Once the child has been treated (if necessary) and has recovered, they can return to school. No exclusion is needed.
Meningitis viral	None.
MRSA (meticillin resistant Staphylococcus aureus)	None.
Mumps	5 days after onset of swelling (if well).
Threadworm	None.
Rotavirus	Until 48 hours after symptoms have subsided.
